100 Multiple Choice Questions

50 AGE PROBLEMS • 50 CONSECUTIVE INTEGER PROBLEMS

Companion practice set to the Day 1 Mastery Guide — solve using the Golden Method.

HOW TO USE THIS SET

Each question has exactly one correct option among (A), (B), (C), and (D).

Do not guess — for every question, write $x = \dots$, translate each sentence, build the equation, and solve it on paper before choosing an option.

This set does not include an answer key. Bring your solved sheet back to your tutor to check and review any question you got wrong, sentence by sentence.
